

DOI Work Activity 0U: Process Oil and Gas Reservoir Management Agreements

Program Area:	Resource Use - Energy
End Outcome Goal:	UEO 1 - ENERGY - Manage or Influence Resource Use to Enhance Public Benefit, Responsible Development, and Economic Value
Intermediate Outcome:	UIO 1.2 (Fossil Fuels) - Enhance Responsible Use Management Practices
DOI Sub process:	4a – Manage use of resources

Examples/Notes: This activity applies only to BLM and MMS

Work Activity Description: Reservoir management for agreements is a process by which a Bureau identifies, analyzes, designates, approves, and monitors the geologic, engineering, and economic aspects of Federal and Indian oil and gas interests. This includes establishing spacing involving Federal and Indian lands; diligence reviews on Indian leases; reviewing IMDA agreements; designating, approving and managing unitization, communitization, compensatory royalty, gas storage and other agreements. This activity includes Natural Gas Policy Act (NGPA) well determinations on application. It does not include activities related to drainage resolution.

Output: Processed reviews/unitization agreements	Unit of Measure: Number of reviews/unitization agreements processed. Number of NGPA applications and tight formation area designations processed. Reviews processed includes: number of agreements recommended for approval, number of Indian diligence reviews conducted, or number of spacing orders processed. BLM State/Field Offices will enter lease information in accordance with data standards as actions are processed. Data will be retrieved by the State Offices and by the national program office using casetypes, action codes and standard LR2000 reporting
Inputs:	Cost Drivers:

System Interfaces: LR2000
